Claims 12-24 and 28-29 are allowed because the prior art of record does not teach or fairly suggest a transparency having a heatable wiper rest area and method of making the transparency comprising a first and second glass sheet, an interlayer, an opaque band positioned on one of the surfaces of the first glass sheet along at least a portion of the selected edge of the first glass sheet at the wiper rest area, and heating arrangement comprising an electrically conductive member, a plurality of bus bars in electrical contact with the conductive member, a first lead, a second lead interconnecting ones of the plurality of bus bars having adjacent discrete heatable areas and one of the

plurality of bus bars connected to the first lead therebetween, or to electrically connect one of the plurality of bus bars connected to the first lead at a position adjacent the first side of the conductive member, wherein a portion of the first lead and a portion of the second lead overlay each other, and an insulating member positioned between the portion of the first lead and the portion of the second lead.
